Dear Colleagues,

I hope that you are all doing well and that we can find a time to get together in the near future. In the interim – I am writing with a request.

The U.S. Environmental Protection Agency (EPA) is developing an employee handbook on scientific integrity. If your organization has already developed such a document, or a handbook chapter that deals with scientific integrity or related topics, I would appreciate it if you could send a copy or a link to it. We have done some searching and have found that some of these documents might be internal and not available on the internet.

I am certain that we would benefit greatly from reviewing your documents as we develop ours.

Thank you,

Francesca

Francesca T. Grifo, Ph. D.
